RE: Construction Permit
Recycle Pond

Dear Mr. Elias:

We have reviewed the plan and information for the tailings and recycle pond at the Barnes Claim near the Dewey Bridge in Grand County. Plans and information submitted June 17 and June 28, 1983 were reviewed.

As a result of our review, the plans for the tailings pond and wastewater recycle system are approved and a construction permit as constituted by this letter is hereby issued provided:

1. The top width of the pond embankment is at least eight feet.
2. The pond embankment slopes are no steeper than two horizontal to one vertical.
3. At least 2 feet of dike freeboard is maintained.

The 25 foot wide 6 foot deep pond is to be used for short term 30 day placer test work where no chemicals will be used. Approximately 30 gallons per minute of wastewater will be discharged to the pond from the physical concentrator system.

A monthly report of the system flow rate and pond freeboard must be sent to this office. Nothing in this letter shall be construed as granting exemption from other local, State or federal regulations.

Sincerely,

UTAH WATER POLLUTION CONTROL COMMITTEE

Calvin K. Sudweeks
Executive Secretary
